

# Charter Heraldry

~ DO's and DONT's ~

## DO

Always incorporate the Heraldic Badge of the Award Order in your Charter Design – if there is one.

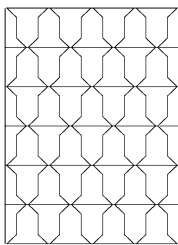

## DON'T

Never use the Kingdom's Heraldic Device in your Charter Design. You may however include separate elements of the heraldry in the design.

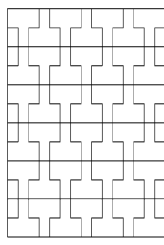

Never incorporate any personal heraldry into your Charter Design

## DON'T - unless

Try not to incorporate blank heater shaped shields into your Charter Design. However, if you must have a shield in your design, draw in the outlines for "vair" or "potent" ~ or ~ put a note in the margin to the scribes that they may only color the shield with a "single" tincture (one heraldic color or metal)

VAIR

POTENT

You may use An Tir's Populace Ensign and/or Populace Badge, however many scribes do not know how to properly color these and having one or the other in your design would mean an absolute must that you also provide notes in the excess margin explaining exactly what to do. It is easier to just not go there.
